

NPDES Permit Compliance and Water Quality

The 5-2-1 Drainage Authority is responsible for compliance with various unfunded federal environmental mandates. Failure to comply may result in fines to the local agencies. Compliance activities include:

- Investigating illicit connections and discharges to the storm drainage system and waterways
- Enforcing erosion control guidelines and regulations during and after construction
- Municipal good housekeeping to prevent stormwater pollution
- Public education and involvement in stormwater quality
- Mapping of the Drainage System and outfalls
