

Permit Compliance

The 5-2-1 DA intends to apply for a single NPDES Phase II Stormwater Permit with the State of Colorado Department of Health and Environment (CDPHE) to replace four current permit holders: Grand Junction, Palisade, Mesa County, and the Grand Valley Drainage District. A single entity will then be responsible for stormwater quality and will administer the permit. These are unfunded, federal environmental mandates. Failure to comply may result in fines of up to \$10,000 a day to the 5-2-1 DA. The following lists of areas have been defined by the State for mandated oversight by a governing authority. The 5-2-1 DA will be carrying out the mandated oversight.

- **Investigation of Dumping**
 - Erosion Control During Construction
 - Post-Construction Erosion Control
 - Municipal Good-House Keeping to Prevent Stormwater Pollution
 - Public Education & Involvement in Stormwater Quality
 - Municipal Mapping of the Drainage System and Outfalls
 - Illicit Discharge Detection and Elimination

- **Land Use Review and Coordination**

Provide input to the subdivision development and new development process.

- **Drainage Report and Construction Plan Review and Approval**
 - Permitting and Inspection
 - Field Inspection and Enforcement
 - Master Plan Coordination

- **Planning and Technical Management**
 - Design Criteria and Standards
 - Field Data Collection
 - Master Planning
 - Design, Field, and Operations Engineering
 - Floodplain Management

- **Customer Service, Billing, Finance**
 - General Administration
 - General Program Development
 - Community Coordination
 - Customer Service
 - Support Services
